Fabric banner "DekoTexx"

How to create your print file

File settings

Format:	final format or scaled (e.g. 1:2)
Resolution:	ratio 1:1 96-150 dpi
	ratio 1:2 192-300 dpi
	ratio 1:10 960-1500 dpi
Bleed:	no
Crop marks:	no
Overprint:	deactivated
Fonts:	embedded or converted to paths
Do not use:	clipping paths, alpha channels, masks

File formats

Digital- and large format printing:
- PDF X-3*, TIFF, JPG, PSD (flattened to background layer), EPS*, AI*

*important notice
The file formats can be created with different programs with various attributes. That can cause numerous errors, e.g. deviation of colours, missing or incorrect fonts, missing elements etc.
To avoid such problems please create your data as a ready to print file in PDF / X-3:2002. To prevent incorrect printing, please
feel free to send or upload your original file's preview (JPG) for comparison.

Colors

|	
Color mode:	CMYK
Color profile:	ISO Coated v2, Coated Fogra 27 / 39

Do not use: RGB and spot colors such as Pantone, HKS and RAL. They will be converted / simulated to CMYK. We cannot guarantee for color differences caused by conversion.

Proof
It is not possible to do color adjustments in the RIP software or at the printer. If color accuracy has high priority, we recommend you a proof beforehand.
The file can be created with several different versions of the color (e.g. small squares with the corresponding CMYK values).
We produce a colorbinding proof on the original material with the original colors. If necessary, you have the opportunity to adjust your file before print.

Notes

- We print and produce with a tolerance up to 0,25%, so the size could differ.
- We could not garantee precisely sizes by millimeter.
- According to the file format, color anomalies may occur.

File upload

upload to our server
Please register in our onlineshop:

2,5 cm

2,5 cm

Eyelets will be placed app. every 50 cm – the distance between the eyelets will vary depending on the size of your banner.
Therefore we strongly recommend not to install the mounting before the banner has been delivered.

Please order the banner in the final format.
Please create the data without trim, bleed or cropmarks.

○ We recommend a safety space of 4 cm for text, logos or other important elements.
This area will be used for the eyelets. (4 cm from all sides)

Special manufacturing

Special placing for the eyelets
If you order a different manufacturing, the standard manufacturing is not applicable.
Please feel free to put marks for the eyelets at the exact position of your printing file.

If your motif is magenta or red, you can also use cyan *100%

● We recommend a safety space of 4 cm for text, logos or other important elements.
This area will be used for the eyelets. (4 cm from all sides)

Diameter: 0,5 cm
Color: 100% Magenta*

IMPORTANT: *Please create the data without trim, bleed or cropmarks.*

Hemstitch:
Please enter the desired diameter of the hemstitch directly in the ordering process.

Please order the banner in the final format.
**Please create the data without trim, bleed or cropmarks.**

Printing width

We are able to print a width of 300 cm and a height of 5.000 cm (50 m) in one part without partition.
If the shortest side exceeds a measurement of 300 cm the vinyl banner will be produced in several parts and weld together to one banner.

Example 1
The height of the banner is 240 cm and the length is 1.000 cm (10 m).
You will get the banner in one piece.

240 cm

Example 1
format 1.000 x 240 cm
consist of one piece

1.000 cm (max. lenght 50 m)

Example 2
The high of the banner is 500 cm and the length is 1.000 cm (10 m).
In this case your banner will be seperated in 5 pieces and sewn together.

500 cm

Example 2
format 1.000 x 500 cm
consist of five pieces

| part 1 | part 2 | part 3 | part 4 | part 5 |

200 cm   200 cm   200 cm   200 cm   200 cm

1.000 cm (10 m)

IMPORTANT: *Please create the data without trim, bleed or cropmarks.*
## Fabric banner "DekoTexx"

Note

In our shop you can find many accessories and suspension-sets for your banner. If you have any questions please let us know.
We set your eyelets every 50cm.
Please do not skip any of them - use them!

Please do not skip any grommets.
We couldn't spare any effort if grommets aren't set every 50 cm.

You get an equal weight distribution if you use all eyelets.

If you only use the corners, the material will succumb and the grommets tear out because of its weight. You havn't any warranty in this case.

DekoTexx

Wrong!
A banner wich is across a street, over a sidewalk, between two street lights or between trees or the like will be exposed to wind permanently, what causes the tear out of the grommets. Our advice: use mesh banners, no traditional dekotexx banners for outdoor advertising.

DURABILITY

Durability: on average 6-12 month. The endurance depends on the solar radiation and and the place of installation.
