##### \*important notice

The file formats can be created with different programs with various attributes. That can cause numerous errors, e.g. deviation of colours, missing or incorrect fonts, missing elements etc.

**To avoid such problems please create your data as a ready to print file in PDF / X-3:2002.** To prevent incorrect printing, please feel free to send or upload your original file's preview (JPG) for comparison.

#### Colors

**Color mode:** CMYK  
**Color profile:** ISO Coated v2, Coated Fogra 27/39

##### Do not use:

RGB and spot colors such as Pantone, HKS and RAL. They will be converted / simulated to CMYK. We cannot guarantee for color differences caused by conversion.

##### Proof

It is not possible to do color adjustments in the RIP software or at the printer. If color accuracy has high priority, we recommend you a proof beforehand.

The file can be created with several different versions of the color (e.g. small squares with the corresponding CMYK values).

We produce a colorbinding proof on the original material with the original colors. If necessary, you have the opportunity to adjust your file before print.

#### Notes

- We print and produce with a tolerance up to 0,25%, so the size could differ.
- We could not guarantee precisely sizes by millimeter.
- According to the file format, color anomalies may occur.
